PROFESSIONAL SUMMARY

Innovative Full stack Software Engineer with over 3 years of experience specializing in the MERN/Next.js/NestJs stack. Proven track record of architecting scalable APIs and interactive frontends for complex platforms, including auction systems and automated financial tools. Dedicated to delivering high-performance web solutions with a focus on clean code and user-centric design.

WORK EXPERIENCE

Full stack Software Engineer Level II

Prakash Software Solution Pvt. Ltd | April 2024 – April 2025

- **Architected and maintained** a high-performance Car Video Upload and Rating System using **NestJs** and **React.js**, ensuring robust backend structure and a seamless frontend experience.
- **Engineered and integrated RESTful APIs** optimized for high-volume video streaming and complex user-driven rating logic, ensuring data consistency across the platform.
- **Created reusable React components** and utilized advanced state management to ensure buffer-free media playback and responsive user interaction.
- **Managed Git repositories** across development and production environments, maintaining high code quality through peer reviews and collaborative feature development.
- **Conducted performance tuning and debugging** across the stack to ensure high reliability and minimal downtime for video-heavy features.

Full stack Software Engineer Level III

Prakash Software Solution Pvt. Ltd | March 2023 – April 2024

- **Designed and developed** responsive web applications including an Invoice Generator using **Next.js**, replacing manual billing with automated, professional PDF generation.
- **Orchestrated a comprehensive Admin Panel** to manage document workflows, integrating APIs to give teams full control over historical data management.
- **Engineered live auction interfaces** using **ReactJs** and **SignalR**, enabling instantaneous, bi-directional bidding updates and real-time data synchronization.
- **Optimized frontend performance** and architected modular backend logic with **NestJs** to facilitate scalability for high-traffic bidding events.
- **Collaborated with cross-functional teams** to implement UI/UX improvements and ensure a consistent user experience across different devices.

Junior Web Developer

Yudiz Solutions Ltd. | July 2022 – January 2023

- **Collaborated on enterprise-level eCommerce platforms** using **Magento2**, focusing on creating scalable and secure online shopping experiences.

- **Developed interactive frontend features** by bridging **ReactJs** with Magento2 and PHP, enhancing the performance and modern interface of legacy structures.
- **Integrated RESTful APIs** and customized UI components to improve the overall checkout and browsing flow.

Web Developer Intern

Yudiz Solutions Ltd. | January 2022 – June 2022

- **Developed foundational web components** and reusable UI elements using **ReactJs**, HTML, CSS, and PHP.
- **Adopted emerging technologies** and modern development workflows through specialized training in Magento2 and Git version control.

PROJECT SUMMARY

Car Video Upload & Rating System

- **Technology Stack:** React.js, NestJs, Node.js, PostgreSQL/MongoDB, Git
- **Developed and maintained** a high-performance full-stack platform for media management, utilizing **React.js** for a responsive frontend and **NestJs** for a scalable backend architecture.
- **Engineered RESTful APIs** optimized for high-volume video data streaming and complex user-driven rating logic, ensuring data consistency and minimal latency.
- **Designed and implemented reusable UI components** to ensure a consistent user experience and accelerate frontend development cycles.
- **Managed version control** and collaborative feature development using **Git**, maintaining high code quality through rigorous peer reviews.

Real-Time Auction & Bidding Platform

- **Technology Stack:** React.js, SignalR, NestJs, SQL, jsPDF
- **Architected a high-performance frontend** for a real-time bidding application, leveraging **SignalR** to enable instantaneous, bi-directional bidding updates and live data synchronization.
- **Orchestrated a comprehensive Admin Panel** to manage auction workflows, giving internal teams full control over item tracking, user management, and historical bidding data.
- **Integrated automated document generation** using **jsPDF**, allowing users to download professional, real-time transaction receipts and auction summaries directly from the browser.
- **Focused on scalability and real-time reliability** to ensure seamless user interactions during high-traffic bidding events.

Automated Invoice & Document Generator

- **Technology Stack:** Next.js, TypeScript, Node.js, Tailwind CSS
- **Designed and developed** a streamlined tool for automated professional document generation using **Next.js**, replacing manual billing processes with a modern, browser-based solution.
- **Built modular and reusable UI components** using **TypeScript** to enhance development efficiency and ensure a clean, professional interface for financial documents.

- **Integrated backend services** to support key features such as historical data tracking, secure document storage, and automated tax calculations.
- **Optimized application performance** and rendering to ensure fast document generation and a responsive user experience across all devices.

TECHNICAL SKILLS

- **Frontend:** ReactJs, NEXTjs, JavaScript (ES6+), HTML5, CSS3.
- **Backend & API:** NestJs, NodeJs, PHP, RESTful APIs, SignalR.
- **Databases:** MongoDB, MySQL
- **Programming:** JavaScript, TypeScript
- **Version Control:** Git
- **UI/UX & Styling:** HTML, CSS3, SCSS
- **Tools & platforms:** Magento2, Git, jsPDF, Python

EDUCATION

B.Tech in Agricultural Information Technology

Anand Agricultural University, Anand | 2018 - 2022 | CGPA: 7.66/10
